Model TESPOP

- 6 dimensions

TESPOP

Universitat Autònoma
de Barcelona

Paloma Valdivia & Carla Quesada

We use TESPOP, it is an instrument with 6 dimensions, which allows us to know the potential for sustainability.

It is a starting point that can be adapted to each of innovation.

We recommend:

1. read the TESPOP.
2. debate and adapt the proposal: a. 6 dimensions, b. 3 challenges, c. 38 variables-internal or external to your innovation project.
3. analyze each variable to determine strengths and seek solutions for weaknesses.
4. prioritize solutions and execute them.
5. redo point 3 and evaluate.
6. prepare to escalate to other contexts.
